## Drug and vaccine authorizations for COVID-19: List of authorized drugs, vaccines and expanded indications

## Date published: 2021-09-16

Drugs and vaccines that have been authorized by Health Canada for use in relation to the COVID-19 pandemic are listed here. https://www.canada.ca/en/health-canada/services/drugs-health-products/covid19-industry/drugs-vaccines-treatments/authorization/list-drugs.html#wb-auto-4

In the list below, the entry for each authorized drug and vaccine includes the:

## authorization holder

brand name, proper name or common name, linked to the rationale for authorizing the product for use against COVID-19

medicinal ingredient(s), strength, dosage form and route of administration

drug identification number (DIN), linked to the entry for the product in the Drug Product Database, which includes the product monograph

therapeutic area (using the World Health Organization's coding system)

Health Canada's control number for the application

ate of authorization

how the drug or vaccine was authorized

In the "authorization" column, there are 4 possible scenarios for each drug or vaccine:

The product was submitted by the company to Health Canada and authorized under the Food and Drug Regulations

The product was submitted by the company for review under section 3 of the interim order (IO) Respecting the Importation, Sale and Advertising of Drugs for Use in Relation to COVID-19 and authorized

The product was submitted by the company for review under section 4 of the interim order and authorized

The product was added to the List of new drugs for expanded indication in relation to the COVID-19 pandemic by Health Canada, under section 15 of the interim order

itraZenecca COVID-19.         Vaccines, for human use         244627         26/02/2021           fizer-BioNTech COVID-19.
