**Subject:** Fw: Council meeting January 18,2022

To Douro-Dummer Council:

When does enough mean enough?  
When does a vote mean a vote?  
Why does the 10% of our community continue to have a vote on the same issue over and over?  
How is 100% of our community represented?

In this instance, I am referring to the less than 10% of our community that choose not to get vaccinated in order to prevent the spread, of a very deadly, very contagious virus. This choice is their selfish right. However, they do not have the right to continue to assert their potentially dangerous decision on the rest of our community.

While our Medical Officer of Health continues to work hard to implement health and safety protocols, based on extensive research and data, developed by scientists and epidemiologists from around the world for our township to follow, our own Councillors Watt and Watson make decisions and take direction from a small group that has no credentials whatsoever and no valid data to support their nonsense. By their own "grandstanding", Councillors Watt and Watson are giving this group credence.

I would also like to ask - if this group did not follow the Council's procedures regarding presentations, why were they not shut down immediately? Once again – this group had no consequences for their behaviour.

It's time that Council stops apologizing and takes a stand to support the whole community.

Paula Cowing
