New natural gas rates

The Ontario Energy Board (OEB) has approved changes to Enbridge Gas' rates effective **April 1, 2022**.

For a typical residential customer the total annual bill increase will be \$117.14. The total impact on your bill will depend on how much gas you use.

Delivery to You

The delivery rates that vary with consumption decreased based on our forecast cost of delivering natural gas to your home. These charges also include a facility carbon charge associated with the operation of Enbridge Gas' facilities to deliver natural gas to you.

Transportation to Enbridge

The transportation charge has decreased by approximately \$12.61 per year for a typical customer due to lower costs for transporting natural gas to Ontario.

Federal Carbon Charge

The federal carbon charge has increased from 7.83 ¢/m³ to 9.79 ¢/m³. This charge increases annually each April. All of the money collected for this charge goes to the government.

Gas Supply Charge

The gas supply charge has increased from 16.7717 ¢/m³ to 18.3745 ¢/m³. The gas supply component of the cost adjustment is currently a refund of 0.6652 ¢/m³. This refund, combined with the gas supply charge, results in a new total effective gas supply rate of 17.7093 ¢/m³.

Cost Adjustment

The current adjustment is a refund of 0.3623 ¢/m³. The cost adjustment reflects the true-up between actual and forecast prices for prior periods. Please see the chart below for the breakdown by component.

Rate Adjustment

The OEB has approved a rate adjustment to reflect the clearance of 2020 federal carbon deferral and variance account balances. This will appear as a one-time charge on customers' April bills, and for a typical residential customer this will be a charge of approximately \$0.72.

The OEB has also approved a rate adjustment to reflect the clearance of 2020 deferral and variance account balances. This will appear as a one-time refund on customers' April bills, and for a typical residential customer this will be a refund of approximately \$5.29.

The adjustments will be combined and appear as a single Rate Adjustment line item on your bill.

Charges for gas used from April 1, 2022 will be calculated using the new approved rates as shown below. The annualized impact is based on a typical residential customer who uses 2,400 cubic metres (m³) per year.
